LILY OF THE VALLEY

Ready for delivery in November

Lily of the Valley is extensively grown for cut flowers for Winter use. They are forced in large quantities and being perfectly hardy can also be grown in shaded locations in borders or under trees, where they will bloom early in the Spring. The flowers, which are bell-shaped and of the purest white color, are highly prized for cutting purposes.

NOTE. We make a specialty of Valley and import absolutely the very finest pips grown, all extra large, firm and robust, with long, fibrous roots which when forced are certain to give satisfaction.

VALLEY CLUMPS

Excellent for naturalizing or outdoor planting in shaded positions. The clumps we offer are extra large, with an abundance of flowering pips which will produce a mass of bloom.

Extra Large Selected Clumps: Each, 35c.; doz., $3.50; 100, $25.00.

LILY OF THE VALLEY (COLD STORAGE)

The demand for COLD STORAGE VALLEY PIPS becoming greater every year, we are now prepared at all times to supply our customers promptly with our SELECTED DRESDEN BRAND

Packed in cases of 250, 500, 1,000 and 2,000 each. Price on application.

IMPORTANT NOTICE

To Those Requiring the Services of a Superintendent, Head Gardener or Assistant

We have at all times on our register the names of competent men who are open for such positions, and will be careful to recommend only such as would be most suitable and with first-class references.

TO GARDENERS WISHING POSITIONS

We constantly have calls for first-class gardeners, and to supply such openings we cheerfully ask those who are in want of a position to apply to us, and we will endeavor to find a suitable place for them. We positively make no charge for this service, either to employer or employee.

RELIABLE BULBS AND ROOTS

FOR FORCING AND OUTDOOR PLANTING

All bulbs sent out by us are true to name, of the largest size, and selected only from those sorts which are the cream of the Holland market.

Therefore, they should not be confounded with the small-sized, low-priced mixtures usually sold.

HYACINTHS

Early French Roman Hyacinths

White Roman Hyacinths are exteusively grown for forcing purposes. The flowers are pure white, delightfully fragrant, and each bulb will throw up from three to four spikes. For forcing, three or four bulbs are generally planted in a pot, in good soil. The pots should be kept in a cool dark place until they fill with roots. They are very easily grown and by making successive plantings may be had in flower all through the Winter.

Double Dark Rose Roman	.60	4.00	35.00
Single Blue Roman	.50	3.75	
Single Yellow Roman	.75	5.00	

Italian Hyacinths

Largely grown for cutting purposes. The flowers are single, very graceful and fragrant. They are hardier than the Romaus, and may be planted outside in the Fall for early Spring cutting.

Named Dutch Hyacinths

Cultural Directions for Growing in Pots. Select heavy bulbs and plant as early as possible, using a six-inch pot for a single bulb. Fill the pots with light, rich potting soil, leaving the top of the bulb just above the surface; give a good watering and set away in a cool place, covering them with about five inches of sand or ashes. In about six weeks they may be taken to the room in which they are to flower. By bringing in a few pots about two weeks apart a succession of bloom may be had during Winter.

Cultural Directions for Planting in the Open Ground. October and November is the proper time, but they can be set out any time as long as the ground remains open. The beds should be well dug to a depth of about 14 inches, and raised from two to four inches above the level of the walks. The bulbs should be planted evenly about six inches deep, and from five to six inches apart. Care must be taken to press the earth firmly around the bulbs, setting each bulb in a handful of sand, to insure drainage.

Cultural Directions for Growing in Glasses. Single Hyacinths do best in glasses, as they produce a much larger spike. Place the bulb in a glass, which should be filled with water so it touches the bottom of the bulb; then put away in a cool place, or on a shelf in the dark part of the cellar, for from six to eight weeks, changing the water every two weeks; then remove them to the light, and place in a cool room with even temperature and they will produce very fine spikes and remain in bloom a long time. A small piece of charcoal in the water is beneficial.

MISCELLANEOUS HYACINTHS, see page 11.

TULIPS

The Tulip is the most popular of all Spring-flowering bulbs. Their brilliancy of color, beauty of form and gorgeous shades render them the most effective of all bulbous plants for bedding and planting in groups or borders. For pot culture and forcing for Winter flowers several varieties are invaluable. Plant outside in October or November about four inches deep and four inches apart. The soil should be well dug and a liberal supply of well-rotted manure applied.

Varieties prefixed by an asterisk (*) are the best for forcing.

Single Duc Van Thol Tulips

Duc van Thol Tulips are of dwarf habit, growing only about six inches, and are generally used for forcing and pot culture.

DARWIN TULIPS

Single Late or May Flowering. The grandest Tulips in existence

This magnificent class is considered to be the finest of the Tulip race, and is becoming more popular every year.

Having many advantages over the older and better known varieties, blooming about four weeks later with massive leaves and long, strong stems from two to three feet in length, supporting the most handsome globe-shaped flowers it is possible to imagine, in every variety of color and shade from the most delicate blue and blush pink, to rose, scarlet, crimson, violet, brown and black, etc.

They are excellent for late forcing, and wherever early Spring cut flowers are desired they are unsurpassed, being especially effective in vases. They also make a brilliant display when planted in masses in the shrubbery border or in herbaceous beds.

In fact, every lover of the beautiful should not fail to include at least some of these Tulips for Fall planting. The following list we consider to be the best varieties offered and will undoubtedly give satisfaction. Any variety not listed below can be supplied at advertised prices.

Empress Narcissus

NARCISSUS, or DAFFODILS

Every year the demand for these charming Spring-flowering bulbs is increasing. They are of easy culture, thriving in almost any soil, and are largely used for naturalizing. The following list contains all the most beautiful varieties, several of which are sweet-scented and excellent for cutting purposes.

Outdoor Culture. Plant four to five inches deep and four to six inches apart, according to size of bulbs. Being perfectly hardy, they make an excellent effect among shrubbery in borders, etc.

Pot Culture. Use same composition as for Hyacinths. For effect plant six bulbs of one variety in bulb-pan or large pot. Keep in a cool dark place for a few weeks until well rooted.

SNOWDROPS

(Galanthus Nivallis)

These lovely little flowers, the first to open in the Spring, should have a place in every garden. They are the hardiest of all bulbs, and can be found pushing their way through the snow in early Spring, flowering two weeks ahead of the Crocus. They thrive in almost any situation or soil; standing more hard treatment than any other plant.

LAWN GRASS SEED

BURNETT'S SPECIAL LAWN GRASS MIXTURE

The above mixture is made from our own formula, and composed of grasses specially adapted for the purpose of producing turf which retains its rich green color and velvety appearance throughout the entire Summer and Fall. In making up this high grade mixture we are careful to use only the very finest quality of all the most desirable dwarf evergreen, *recleaned*, grasses, free from chaff and weeds, which thrive well on any soil, thus ensuring a beautiful and permanent lawn.

To obtain good results Lawn Grass Seed should be sown as soon as the ground can be prepared in early Spring. It may also be sown in the Fall with good results. One quart will sow 15 x 20 feet (300 square feet); 1 bushel, 100 x 108 feet (10,800 square feet); 4 to 5 bushels to the acre.

Price: Qt. 25c., pk. $1.75, bush. (20 lbs.) $6.00.

CENTRAL PARK LAWN GRASS

This well-known mixture contains a large proportion of permanent grasses that grow quickly, producing a rich, green sward in about four weeks from time of sowing. Central Park is very hardy and has always given entire satisfaction in any location wherever sown. One quart will sow 15 x 20 feet; 1 bushel, 100 x 108 feet; 4 to 5 bushels to the acre.

Price: Qt. 20c., pk. $1.50, bush. (20 lbs.) $5.00.

Full directions for making a lawn printed on each box.

GRASS SEED FOR BANKS AND TERRACES

A mixture of grasses with long interlacing matting roots that will bind steep embankments, gravelly or sandy slopes, etc., preventing wash-outs by rainstorms and covering with permanently green turf. Price: Qt. 30c., pk. $1.75, bush. (20 lbs.) $6.50.

LAWN GRASS FOR SHADY PLACES AND UNDER TREES

A selection of grasses that thrive well in shaded situations, under trees, or close to walls where there is little sun. Price: Qt. 30c., pk. $2.00, bush. (20 lbs.) $7.00.

GOLF LINKS GRASS MIXTURES

These mixtures will produce a tough, lasting sod that withstands extremes of heat and drought.

Fair Green Mixture. Bush. (20 lbs.) $5.00.

Putting Green Mixture. Qt. 30c., pk. $2.00, bush. (20 lbs.) $7.00.

"STANDARD" FLOWER POTS

The Advantages of Standard Pots:

FIRST—Uniform sizes throughout the country.

SECOND—Breakage is not one-half as great as in other pots, the deep rim protecting them from any ordinary hard usage.

THIRD—The foot keeps the pot up from the bench, so that it is impossible for the hole to become clogged.

All Standard Pots from 7-inch and above are provided with the patent Excelsior bottom which insures perfect drainage.
